

MGI TO PRESENT EXPANDED DIGITAL PRINTING & FINISHING CAPABILITIES AT PRINT 09

Highlights include new Super Format printing for Meteor DP60 Pro multi-substrate digital press and the 20 x 29" JETvarnish digital inkjet spot UV coater

Melbourne, Fla (July 29, 2009) - MGI Digital Graphic Technology / MGI USA, the multi-substrate (paper and plastic) digital press and finishing solution manufacturer, will present a range of expanded digital printing and finishing capabilities at PRINT 09, held September 11-16 in Chicago (booth #4329). Highlights include new Super Format print modes (**up to 13 x 47"**) for the Meteor DP60 Pro[®] multi-substrate digital press and the US premiere of the 20 x 29" (52 x 74 cm) format JETvarnish[®] digital inkjet spot UV coater. MGI's solutions continue to raise the bar for digital innovation and provide printers with versatile, affordable options to increase productivity and maximize profitability.

Meteor DP60 Pro 4-color multi-substrate digital press – NEW Super Format printing

With the introduction of Super Format printing for the award-winning Meteor DP60 Pro, MGI offers yet another advantage that no other digital press can match. **Users can print on sheets from 4" x 6" (100 x 150 mm) up to 13 x 47" (330 x 1194 mm) – the widest cut sheet range of any digital press.** The extended size sheets are fed through the air feed system and offset feeder table on the Meteor DP60 Pro, an MGI exclusive feature which guarantees precise registration at production speeds. Sheets up to 13 x 26" (330 x 650 mm) can be accommodated by the standard factory configuration; an optional kit extends the Meteor DP60 Pro's feeder table in order to accommodate sheets up to 13 x 40.15" (330 x 1020 mm). Sheets up to 13 x 47" are fed via manual bypass and do not utilize the offset feeder table/air feed system.

MGI's new Super Format options allow users to produce an even wider range of applications, including book covers, banners, tri-fold brochures or mailers, calendars, panoramic posters and folders, as well as gang runs.

The most versatile digital press in the industry, the Meteor DP60 Pro can handle paper weights from 20 lb bond up to 130 lb cover (70 to 350 gsm) and plastics from 4 mil up to 16 mil (from 100 μ up to 400 μ). Compatible substrates include CS1/CS2, bond, Bristol and art/textured papers; PVC, polyester, polycarbonate, PET, polypropylene, vinyl and Teslin[®], as well as envelopes and certain specialty substrates such as canvas/buckram. The Meteor DP60 Pro is designed for higher volume applications, producing up to 3900 A4/letter pages per hour in brilliant 2400 dpi @ 200 lpi resolution with full variable data. Other MGI exclusive features include an IR module/ climate control system and pre-loaded substrate profiles (allowing the user to switch between paper and plastics in a matter of minutes). With the addition of the EnvelopExpress[®], printers have a digital solution for 4-color envelope printing with continuous feed capabilities.

At GRAPH EXPO 2008, the Meteor DP60 Pro was named as a MUST SEE 'EM in the *Presses – Production Color Digital* category, recognizing technologies that will impact virtually all printers.

JETvarnish digital inkjet spot UV coater – 20" x 29" / 52 x 74 cm format

At PRINT 09, MGI will present the 20 x 29" / 52 x 74 cm format JETvarnish, the revolutionary and award-winning digital inkjet spot UV coater. The 100% digital JETvarnish can handle runs from one to thousands with ease with full variable data capabilities. Computer controlled drop-on-demand print heads allow for precise spot coverage and the integrated UV lamp enables instant drying and immediate handling.

- Drastically lower production cost compared to offset or screen spot varnish methods
- No plates, screens or messy cleanup required with virtually no make-ready
- Accommodates a wide range of coated paper and plastic substrates, up to 600 gsm/220 lb cover
- Produces up to 0.5 m / sec
- MGI's Eco-Concept: environmentally friendly design virtually eliminates waste of raw materials and packaging, is solvent free and utilizes "green" consumables
- **100% variable data capable (via optional RIP)**

- Push-button integration with most DTP software
- Ideal for a host of applications, including book covers, posters, brochures, personalized direct mail, standard & luxury packaging (including prototyping), corporate materials and many others

The JETvarnish has won two awards in recognition of technological achievement in two distinct industries – the 2008 Oscar de l'Emballage (packaging) and the Best Product of the Year 2009 from the European Digital Press Association (commercial printing).

MGI will also present the award-winning **Meteor DP20[®] 4-in-1 digital photo press** (auto duplex print, laminate, cut and crease in just one pass), a “business-in-a-box” solution for photo and graphics professionals. The Meteor DP20 is ideal for producing photo books, calendars, photo prints, greeting cards, flyers and a host of other applications, and was honored with the 2009 DIMA Innovative Digital Product award, which recognized new and industry-changing technologies.

Also on display will be MGI's complete line of digital printing and finishing solutions, including the UVarnish[®] offline auto-feed flood UV coater, PressCard Pro[®] hot platen lamination unit, and PunchCard Pro[®] CR-80 format die cutter.

Visit MGI at PRINT 09 at booth #4329 to learn more about our versatile line of digital printing and finishing solutions for paper, plastics & envelopes and to receive a personalized demonstration.

About MGI Digital Graphic Technology

Founded in 1982, MGI Digital Graphic Technology designs, manufactures and markets a full and innovative range of award-winning multi-substrate (paper and plastic) 4-color digital presses, as well as a complete line of versatile finishing solutions, including the multiple award-winning JETvarnish[®] digital inkjet spot UV coater.

A key player in the global market, MGI has a portfolio comprised of several thousand customers in a wide range of sectors, including graphic industry professionals, Fortune 1000 companies, government agencies, plastic card manufacturers, silk screeners and photo labs.

MGI is a leader in the professional graphic equipment market and is registered on the Euronext Paris Alternext stock exchange (symbol: ALMDG). They received the prestigious OSEO ANVAR “Innovative Company” Label in 2007 in recognition of their expertise and innovation in the graphic & finishing industry.

MGI USA, based in Melbourne, Florida, is MGI's fully owned subsidiary that services the North and South American, Caribbean and Asia/Pacific markets.
