

Press Release.

Greenville, SC. November 3, 2009

TruColor has taken delivery of a Sakurai 458EII four color press with CIP/4 interface. Gary Southern, General Manager, completed a thorough study of automated off-set presses and selected the Sakurai. Per Gary Southern, print quality, automation and ease of operation were some of the factors that played a key role in the decision to purchase the Sakurai. TruColor has also installed a new Horizon SPF-200 series high speed booklet making system. TruColor selected Paper Handling Solutions (PHS), their long term press and bindery equipment supplier, to furnish and install the Horizon and Sakurai.
