

# Sterling Digibinder

Perfect bind up to 360 books per hour up to 2 inches thick! Small enough for an office, the Digibinder is also ideal for in plant and on demand printers.

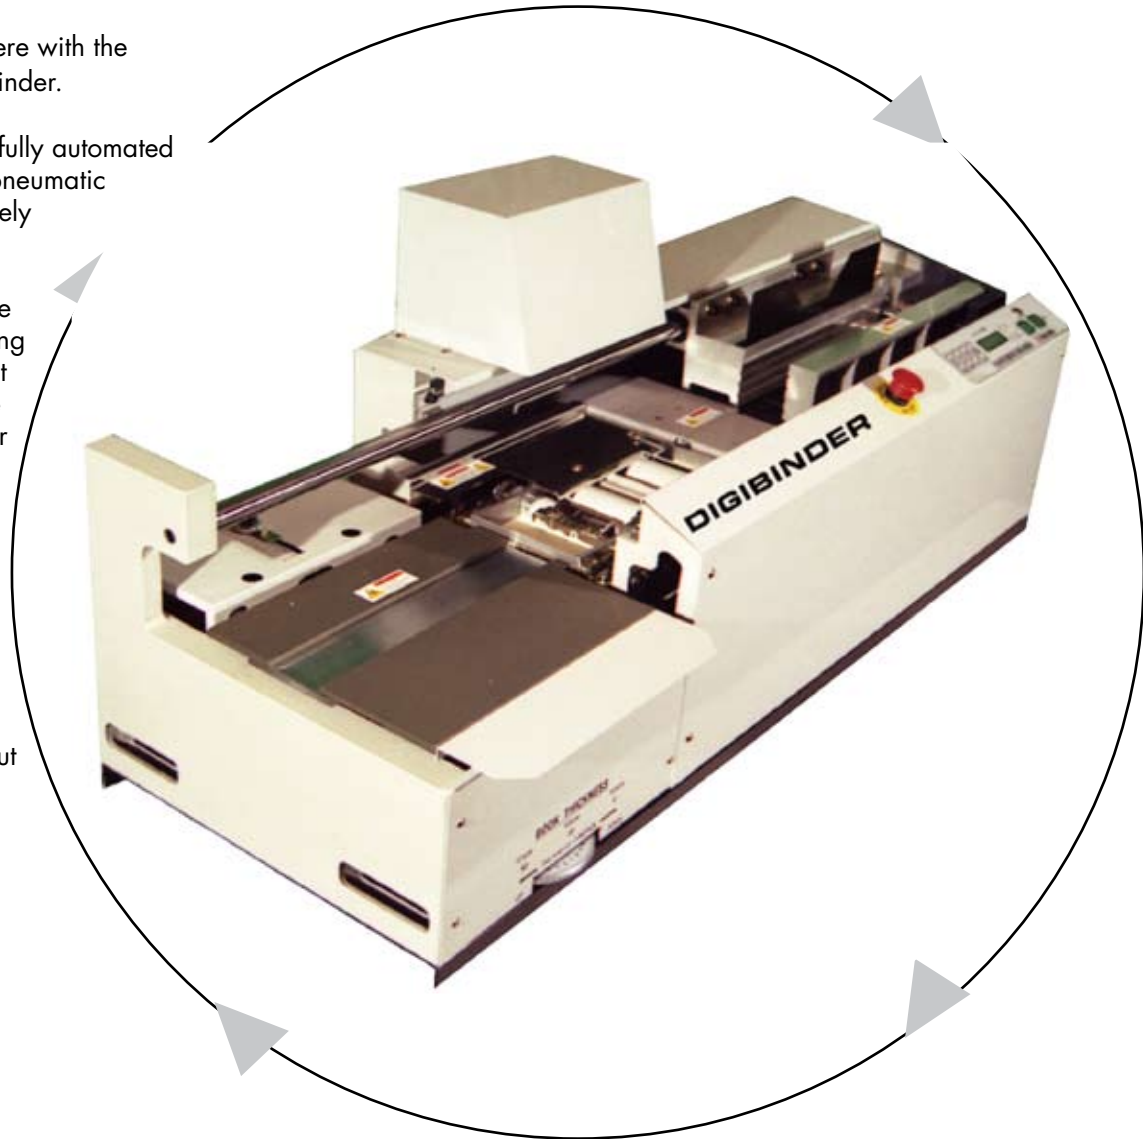

One touch perfect binding is here with the Sterling Digibinder ® perfect binder.

The Sterling Digibinder ® is a fully automated perfect binder, the book size, pneumatic clamp, and nipper are completely self adjusting.

The Digibinder roughs the entire backbone and notches. Notching blades are two small points that turn on a wheel and scrape the backbone of a book block prior to gluing. This creates what looks like a barber pole on the spine of the book block and the glue will seep into these spiral gouges in the spine.

Twin glue rollers ensure an even glue application. There is absolutely no set up. Go from thick books to thin books without any adjustments.

Supplies:  
Digi-Glue 90 - Used with bond and offset paper stocks.  
Digi-Glue 94 - Used with Gloss and coated paper stocks.

## Specifications

Maximum Length:	12-1/2"
